Subject: media call - CFAC Site

Hey Rich,

FYI, Dillon Tabish with the Flathead Beacon contacted me about the draft CIP for the CFAC Site that we distributed to the community.

At first I told him that I would need to coordinate my response and asked if he could send me the questions. Then I remembered that I am taking off for two weeks and that wouldn't work so well. Because this was a benign inquiry and wanting folks to know about the CIP availability as soon as possible, I opted to answer the questions. Here is the gist:

- **How was the CIP developed?** With community input derived from community interviews, meetings, and other outreach events.
- **Is this a draft?** Yes, the CIP is an initial draft. EPA is requesting feedback and will update the plan accordingly. (I also mentioned that CIPs are often dynamic documents meant to be updated periodically as site conditions and community concerns change and as we move through the Superfund Process).
- **When will the initial data be available from the RI:** EPA expects the initial data from the RI, and a draft summary report to be available soon. When that happens, EPA will work to get that information available on our web page and at the site information repository. After the information is available, EPA will coordinate with the City of Columbia Falls to set up a date/venue to discuss the data, draft summary report, draft CIP, and other Site Updates.

Mr. Tabish said that the update will be published on-line today and next week in the hardcopy distribution. Let me know if you have questions. Thanks!
